SUMMARY

- Unity Developer with 1 year of hands-on experience building 2D and 3D games using Unity, specializing in gameplay systems, multiplayer integration, and performance optimization.
- Proficient in Blender for asset creation and DOTween for polished animations, with a strong focus on writing clean, maintainable C# code and delivering production-ready game features.

EDUCATION

Government ITI SCDD elathur

- A Desktop Publishing (DTP) Operator
2020 -2021

Higher secondary GVHSS Cheruvannur

Higher Secondary in Humanities
2018 – 2020

CORE COMPETENCIES

- Game Engine:** Unity 2D/3D, Unity Editor, NavMesh, Tilemap, Animator, Physics System
- Programming:** C#, Object-Oriented Programming (OOP), Data Structures
- Game Systems:** AI Pathfinding (BFS, A*), Enemy Behavior, State Machines, Combat Systems, Grid Systems
- Multiplayer:** Photon PUN, Net Code
- Animation & UI:** DOTween, Unity Canvas UI, HUD Systems, UI Animation
- Tools & Software:** Blender (Basic Modeling)
- Platforms:** PC, Android, IOS

CERTIFICATIONS

DIPLOMA IN GAME DEVELOPMENT

Big Boy School Of Gaming - Kochi
Apr 2024 -Nov 2024

- Completed a Diploma in Unity Game Development with practical experience in Unity 2D, Unity 3D, and C# programming, focusing on gameplay mechanics, scripting, and performance optimization.
- Developed strong practical expertise in designing and building immersive games and interactive applications within an intensive, hands-on training period, emphasizing gameplay systems, UI implementation, and optimized scripting workflows.

KEY ACHIEVEMENTS

- Mentored students in Unity 2D & 3D game development, guiding them to create fully functional game projects.
- Conducted practical sessions on game mechanics, animations, and optimization techniques.
- Developed and implemented AI-driven gameplay systems including adaptive enemy behavior and combat mechanics using Unity and C#.
- Collaborated with designers and testers to enhance gameplay quality and user experience.
- Debugged and resolved gameplay issues, improving overall stability and performance.

PROFESSIONAL EXPERIENCE

Associate Game Developer & Trainer- Unity

Infocom Software Pvt.Ltd | Feb 2025- Present

- Developed engaging games using Unity Engine, leveraging expertise in Unity C# programming, Unity 2D, and Unity 3D.
- Integrated APIs, implemented DOTWEEN animations, and built multiplayer functionality using Photon and NetCode.
- Designed scalable architectures using Scriptable Objects and modular coding practices
- Optimized game mechanics with strong knowledge of data

PROJECTS

MULTIPLAYER SHOOTING GAME (Netcode)

- Developed a 3D multiplayer third-person shooting game in Unity
- Developed a 3D multiplayer shooting game using Unity, C#, and Unity Netcode for GameObjects (NGO).
- Implemented real-time player movement, spawning, and shooting synchronization in a multiplayer environment.
- Built combat systems using raycasting, RPC communication, and Network Animator integration.
- Designed smooth third-person camera and character controller mechanics with animation blending.

Dynamic Pathfinding Defense

- Developed a dynamic tower defense game with intelligent enemy pathfinding using Unity.
- Built wave-based enemy spawning with pathfinding, along with tower targeting, projectile systems, upgrades, and health/damage mechanics.
- Implemented enemy pathfinding using the Breadth-First Search (BFS) algorithm on a grid-based map to calculate the shortest path to the player's base.

Endless Snow Sliding Game (3D)

- Developed an endless snow sliding game with smooth player movement and interactive snowy environments using Unity. Implemented precision cutting mechanics, timer systems, and gameplay interactions.
- Implemented endless runner mechanics with dynamic obstacle spawning and increasing gameplay difficulty.
- Built coin spawning and coin collection systems with real-time score tracking features.
- Integrated **rewarded advertisement** systems to provide players with additional in-game coin rewards.
